

ENVIRONMENTAL AND SOCIAL SUPPORT PROJECT INFORMATION FOR INVESTMENT PARTNERS

Edge5 is a leading consultancy specializing in Design, Training, and Delivery for social and environmental support projects. Our expertise lies in serving businesses operating in the mining/energy, NGO, and rural community sectors. With a team of experienced Permaculture experts, we are uniquely positioned to assist clients in achieving their Sustainable Development Goals and strengthening their social license to operate.

At Edge5, we prioritize building long-lasting client partnerships that foster growth for all stakeholders. Our solutions are tailored to meet the specific needs of each client. Projects usually consist of multiple services to achieve agreed results.

Edge5 projects can be but not limited to:

Community Development projects - are typically multi-year projects and include the delivery of more than one activity/solution to achieve a long-term Impact. At Edge5, we collaborate with all relevant stakeholders to design and develop these projects, ensuring they effectively address specific identified needs within the community. Our approach focuses on delivering a range of solutions to achieve long-term positive outcomes.

Training and Education – we plan, develop, and deliver training programs tailored to the needs of communities and the local environment. Our training empowers individuals and gives them the tools to improve their own lives, and the ability to initiate positive change in the wider community.

Organisations wishing to partner with Edge5 are requested to submit a [project application form](#). This Form allows us to get a better understanding of your project and organisation. Before submitting the form, please ensure your project falls into at least one of our markets and services.

Markets

- Mining and Energy groups
- NGOs
- Rural Communities
- Government & public sectors
- Farming
- Hobby Farming
- Indigenous Communities
- Environmental Conservation
