CAPABILITY STATEMENT

Edge5

About Edge5

Edge5 delivers community development services to the Mining and Energy Industry. Our core focus areas include stakeholder engagement, social impact assessment, sustainable development planning, local food security, education, and training programs. We have ongoing experiences working with NGOS, mining companies and other private sectors. Edge5 helps and supports our clients to engage with communities in a manner that help build trust and secure and maintain the Social License to Operate.

Core Competencies

- Community analysis and development.
- Local food & water security.
- Education and training.
- Community relocation planning.
- Ecological land restoration, Regeneration and Re-hydration.
- Landscape design.

Differentiators

- Addressing SDGs at the grass roots level.
- Strengthening the social licence to operate.
- Holistic approach to community engagement.
- 25 years of experience working in remote communities across Africa, Asia, and Australia.
- Horticulture and Arboriculture including tree surgery and vermiculture.

Experience and Track Record

Over the years, we have successfully collaborated with mining companies and other organisations, delivering impactful community development initiatives. Some of our notable projects include:

Rainbow Ridge: Partnered with Communities Assist to implement sustainable infrastructure projects, resulting in improved living conditions for local residents.

Training and Education in Mali: Edge5 provided training to Resolute Resources community engagement staff and village residents. Staff and residents benefited from our 'Introduction to Permaculture Design' program. The program's focus was introducing the idea of food support from gardens, at the household and community garden level.
